

Hello. Thank you for buying my asset.

How to setup?

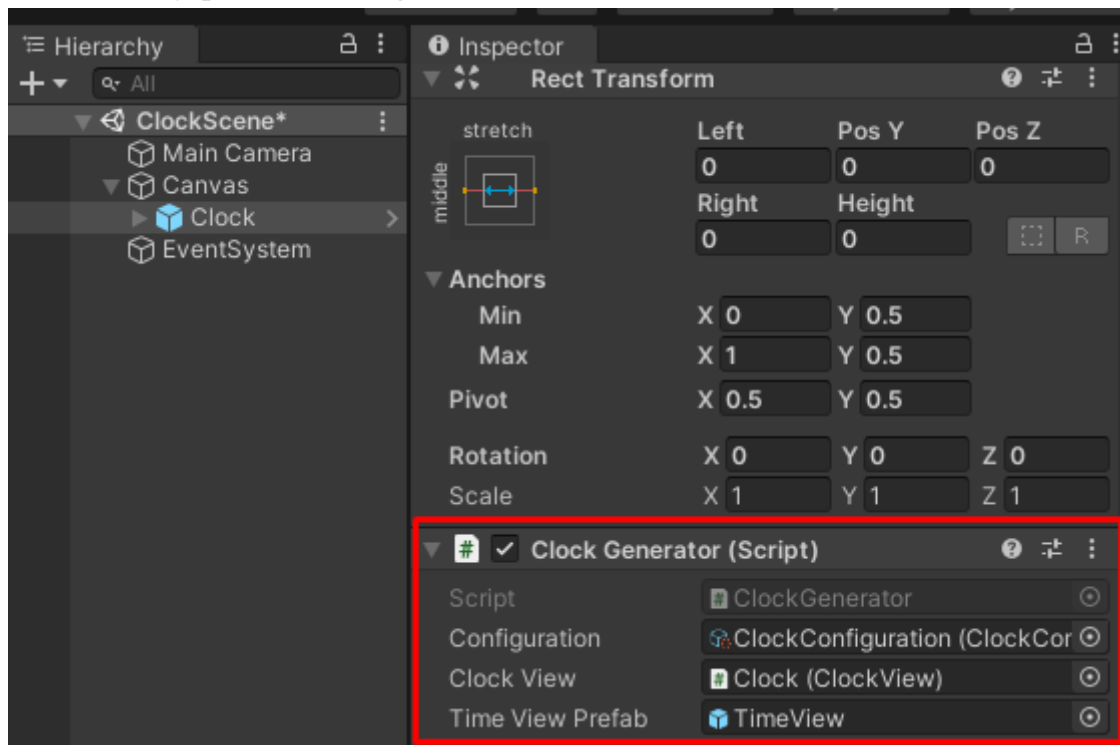

- 1) Find ClockConfigurationSO scriptable object and choose time format 12 or 24:

- 2) Success. Now you can use asset.

Modern Clock (MVC) v 1.0 - SelvAssets

1) The entry point of this game is:

This component generate clock based on configuration parameters.

Asset created on MVC pattern, so you can learn something new for yourself.

For other questions write me an email: support@selvassets.ltd.ua

Thank you for advance!
